ADMINISTRATIVE HISTORY

Prior to 1972, the transportation function for Montgomery County was performed by the Bureau of Traffic Engineering, a division of the Department of Public Works. The Bureau conducted and analyzed traffic surveys and planned for safe traffic flow patterns on County road systems. It also coordinated the engineering activities of the County, cities, towns, urban districts, and the State of Maryland to develop an efficient street and highway system in Montgomery County. The Bureau included the office of the Bureau Chief and the Divisions of Traffic Planning and Survey of Traffic Operations.

In 1972, Council Bill 25-72 established the Department of Transportation in the County Executive's Reorganization Plan II. The Department of Public Works was abolished, and the newly created Department of Transportation took over all public works activities except solid waste management. The former Bureau of Refuse Collection and Disposal became part of the Department of Environmental Protection.

The Department of Transportation plans, coordinates the development of, and maintains the County road system, public parking lots, bridges, storm drains, sidewalks, curbs and gutters, street lights, and traffic signals. The Division of Services cares for trees and collects leaves on rights-of-way to keep the road system free from obstruction. The Division of Equipment acquires and maintains vehicles and maintenance equipment.

The Office of the Director, the Office of Administrative Services, and the Division of Transportation Engineering perform the Department's planning and development activities which must first be approved by the Capital Improvements Program. These functions include the design of roads, bridges, storm drains, and other public facilities affecting transportation. New facilities come under the care of the Division of Operations after their completion.

EXTENT

41.3 cubic feet

SCOPE AND CONTENT

The records of the Montgomery County Department of Transportation date from 1938 to 1989, with the bulk of the material dating from 1950-1959. Materials in this collection consist largely of the Department's files regarding its Capital Improvement Projects between 1950 and 1984. Maps, plats, drawings, 16mm films, aperture cards, and correspondence between the Department of Transportation, other County agencies, and the County Council reflect the planning and implementation of road and sidewalk improvements in Montgomery County. Correspondence, public hearing transcripts, and photographs document citizens' responses to the Department's improvement plans. Folders are arranged numerically by project number. An alphabetical index by street name is attached to the finding aid as an appendix.

CONDITIONS GOVERNING ACCESS

This collection is open for research.

LANGUAGE

English.

PROVENANCE

Material was transferred from the Records Center as part of Accession #88-12. Three accruals that included material in this collection were added in 1990.

USING THESE RECORDS

To request records listed in this finding aid, the following information should be given to the archivist:

Record Group 06, **Records of the Department of Transportation**, Series Number and Name, Box Number and Folder Title(s).

The preferred citation for materials from these records is:

Montgomery County Archives; Gaithersburg, Maryland. Record Group 06: Public Works and Transportation. Record Title: Records of the Department of Transportation. Series number and series name. Subseries number and subseries name, if applicable. Box number and folder title, if appropriate.

PROCESSING PROCEDURES

General processing procedures consisted of discarding duplicates, unnecessary binders, and routine transmittals. Oversized documents and photographs were removed from the original location in their assigned series and placed in separate containers. Separation sheets were inserted in the original location within the folder to indicate the new location of any records placed elsewhere.

Preservation copying of newspaper clippings was performed whenever feasible. Records in folders were arranged, unless otherwise indicated, in forward chronological order, with undated records appearing at the end of the folder. The records include a large number of photographs and oversized plats and plans. The photographs were removed to the photograph files (Audiovisual Record Group 19), while oversized materials were placed in map cases and oversized flat files.
